## Summary

---

*Junior penetration Tester that has ability to identify, exploit and remediate vulnerabilities in Network and web applications , And motivated by the challenge of breaking into the latest technologies.*

## Education and relevant courses

---

***Bachelor degree of Computers and Information Technology | Cumulative GPA 3.42***

***Beni-Suef University, 2022***

***Graduation Project : Web Application Firewall | Excellent***

### **Self-study courses**

- E-learn security penetration testing student .(PTS)
- E-learn security penetration testing professional .(PTPv5)
- E-learn security web application penetration testing .(WAPTv3)
- Linux redhat admin 1& 2
- Network+

## Technical skills

- 
- Network vulnerability scan and penetration testing (plan , discover , exploit , report and remediation).
  - Basic knowledge of exploitation development .
  - Automation tools /Develops .
  - Disk and memory forensics .
  - Maintained network performance by performing network monitoring and analysis, performance tuning, troubleshooting network problems. Skilled using Burp Suite, Acunetix Automatic Scanner, NMAP, Dir-Buster, Dir Search, , Nessus, SQL Map for web application penetration testing.

- Familiar with Digital forensics investigation.
- Good knowledge of socket programming , network protocols and TCP/IP & OSI models .
- Network management and active directory knowledge .
- Familiar with password hash cracking ,MD5,SHA1,SHA2, etc .
- Linux and windows privilege escalation .
- Real-time traffic and packet analysis with Wireshark and tcpdump .
- Knowledge of OWASP TOP 10 .
- Hardware and software troubleshooting .
- **Databases:** MySQL, MS SQL, Oracle
- **Programming and scripting Languages:** C++, Java, php ,python , bash
- CTFs and machines player at
  - [Cyber Talents](#)
  - [Hack The Box](#)
  - [Try Hack Me](#)

## Teaching Experience

---

### **Cyber Security Instructor – Faculty of Computers And Artificial intelligence**

Delivered lectures and hands-on training sessions for the **Introduction to Cyber Security** course.

- Designed and developed practical labs to enhance students' understanding of real-world cyber threats and vulnerabilities, including:
  - **Cross-Site Scripting (XSS)**
  - **SQL Injection (SQLi)**
- Provided students with in-depth guidance on identifying, exploiting, and mitigating vulnerabilities through:
  - **Source Code Review** for secure coding practices.
  - **Remediation Techniques (input validation , output decoding , prepared statement)** to fix identified weaknesses effectively.
- Assisted students with project work, focusing on practical applications of cybersecurity principles in both attack and defense.

## Strength .

---

- Good oral, written & presentation skills .
- Public Speaking, Report Writing, Team Player.
- Lead & work as a team in an organized way.
- Action-oriented and result-focused
- Strong organizational skills and ability to multi-task
